Thanks Jenny.

I just got off the phone with Nick Kunz who works the forestry program for the Northern California Water Board. Nick is the individual from CA who provided us insights on how CA deals with aerial application of herbicides. Based on our conversation, I developed language for the CA landslides section and inserted in the version of the document I sent to you earlier.

Let me know if you have any questions.

Alan

Thanks so much, Alan. You really didn't have to set everything aside for this – well, not until Monday at least! I added in your pieces but am going to work on it tomorrow, too. I talked with Dave, so we're good for Monday morning. I'll put some questions in the margins for us to ask you about for Monday, and we can strategize on other parts. Hope you have a good rest of the week!

Jenny,

I am stilling working the CA landslides piece but I did not want to hold up the briefing document so I am sending you what I have thus far. I plan to continue working on the CA landslides piece this afternoon.

Let me know if you have any questions.

Alan
